

## Virofense™ sanitizing spray and disinfectant spray for cleaning.

Ready to use waterless hand sanitizer Virofense™ is a hand sanitizer to help decrease bacteria and viruses on the skin and disinfectant for cleaning. Recommended for repeated use.

### ABOUT

## VIROFENSE™

ViroFense is strong enough to sanitize surfaces and safe enough to use on your hands!

### What you need to know

- Disinfectant
- Antimicrobial
- Kills bacteria, viruses, yeast & protozoa
- Continued protection after dried
- NCD# 75687-111-16, 75687-111-28

### Virofense

Non-alcohol based hand sanitizer does not dry hands and does not lead to skin irritation the way alcohol-based hand sanitizers do.

Non-Alcohol based hand sanitizers are not flammable while alcohol-based formulations are flammable and can compromise safety.

Virofense™ hand sanitizing spray uses alkyl dimethyl benzyl ammonium chloride as its active ingredient.

It is not necessary to wash hands prior to using Virofense™ hand sanitizer unless hands are visibly soiled, in which case dirt or grime should be washed off with soap and water. Otherwise, no water is needed.

There are no added dyes or artificial colors in Virofense™.

### Directions

Apply directly to hands and briskly rub all areas especially between the fingers and finger nail area. The active ingredients of this product will help prevent bacterial and viral growth after it dries.

Non-Alcohol based Virofense™ hand sanitizer is ideal for personal or commercial use, including but not limited to:

- ✓ Stores
- ✓ Schools and education centers
- ✓ Universities and libraries
- ✓ Prisons, jails and detention centers
- ✓ Health centers
- ✓ Locations susceptible to fire hazard, including brush fires, accidental fire or arson
- ✓ Group homes, such as nursing homes, youth homes and senior centers
- ✓ Hotels, restaurants and casinos
- ✓ Ballparks, athletic arenas and stadiums
- ✓ Concert halls
- ✓ Food trucks
- ✓ Parks and outdoor festivals

## WHY USE NON-ALCOHOL BASED HAND SANITIZER?

Virofense™ Non-Alcohol based sanitizer is an effective hand and surface sanitizer for use in killing germs, including bacteria and viruses.

In fact, Virofense™ is effective because instead of evaporating quickly, like alcohol does, Virofense™ remains on the hands and surfaces to continue killing bacteria and viruses long after the product has been applied. This also means that Virofense™ does not need to be reapplied as frequently, requiring less of the product.

Many popular brands of 70 percent alcohol hand sanitizer gels kill 99.99 percent of germs, which is comparable to Virofense™. However Virofense™ does not have the disadvantages, including flammability and drying or damaging skin while needing to be constantly reapplied. The germ-killing benefits of alcohol-based hand sanitizers vanishes in seconds when the sanitizer dries, but Virofense™ lasts longer by creating a protective layer on the skin and surfaces.

The amount required is generally just enough to cover both sides of your hands and between fingers. Spray Virofense™ on palm and rub hands together, rub between fingers and around the thumb, and rub Virofense™ on the top of hands and allow the Virofense™ to dry without wiping it off before drying. Virofense™ will kill all germs within seconds and continue to protect hands from bacteria and viruses.

### Active Ingredient:

Alkyl Dimethyl Benzyl Ammonium Chloride C12-C18.....0.25%

### Warnings

**For external use only. DO NOT ingest this product**

**When using this product keep out of eyes.** In case of contact with eyes, flush thoroughly with water. Do not inhale or ingest.

**Stop use and ask a doctor if irritation or redness develops.**

**Keep out of reach of children.** If swallowed, get medical attention right away.

**Benefits of non alcohol based hand sanitizer:** Safe, non-flammable formula. Will not dry skin like alcohol-based sanitizers. Kills 99.99% of common germs in 15 seconds and continues protecting against germs landing on hands or surfaces even after drying. No water needed; rub in and let dry.
